*Product designer for* human–AI collaboration.

# RABIYA IJAZ

Portfolio 2026 rabiyaijaz.vercel.app

HELLO

# I make complicated systems *feel human.*

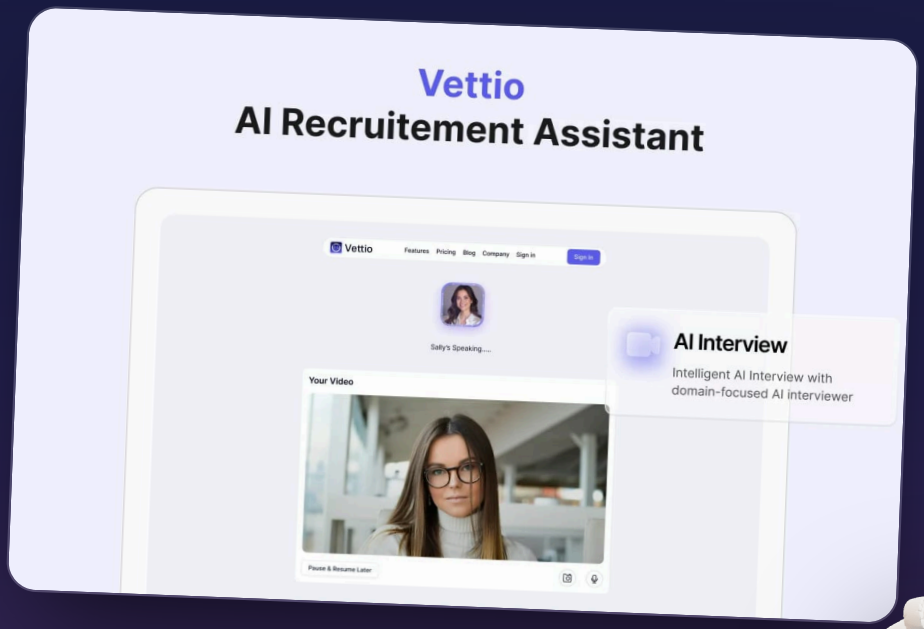

4+ years across recruitment, finance, healthcare and AI, from Peshawar.

Every project reads in the same order: **the question → the method → what I found → what I decided → where it stands.**

CONTENTS

| | | |
|---|---|---|
| 01 | **VETTIO** | AI recruitment |
| 02 | **CREWNITY** | AI finance |
| 03 | **FLOWNET** | Clinical training |
| 04 | **CYSTERCARE** | Women's health · AI |
| 05 | **ACCESS ADDA** | Accessibility game |
| 06 | **TAMASHA BANAO** | Community · Brand and UX |
| 07 | **REPSHEP** | Gym management · AI |

01

VETTIO · AI RECRUITMENT · 2024–26

# HIRING, AS ONE CONVERSATION.

ROLE
Senior Product Designer

TIMELINE
Sep 2024 – May 2026

CONTEXT
Vettio, Dubai (remote)

THE QUESTION

# Why do candidates leave an AI interview halfway through?

METHOD

01
Competitor review: Mercor, Teal, Workable

02
Candidate and recruiter journeys, mapped side by side

03
Session recordings and heatmaps in Hotjar

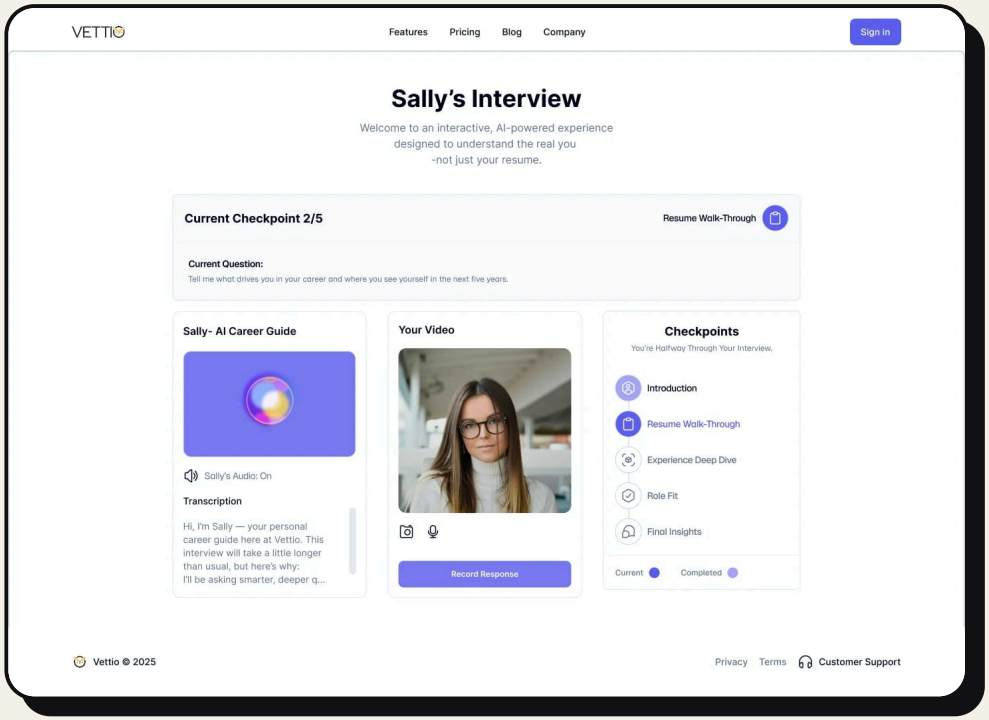

**5**
checkpoints, instead of a question count

FINDING

> *They didn't leave before the interview. They left during it.*

SO I DECIDED

# SHOW THE END. FIVE CHECKPOINTS, NEVER A QUESTION COUNT.

OUTCOME

# SHIPPED. RECRUITER WORKFLOW EFFICIENCY UP 30%.

NEXT TIME

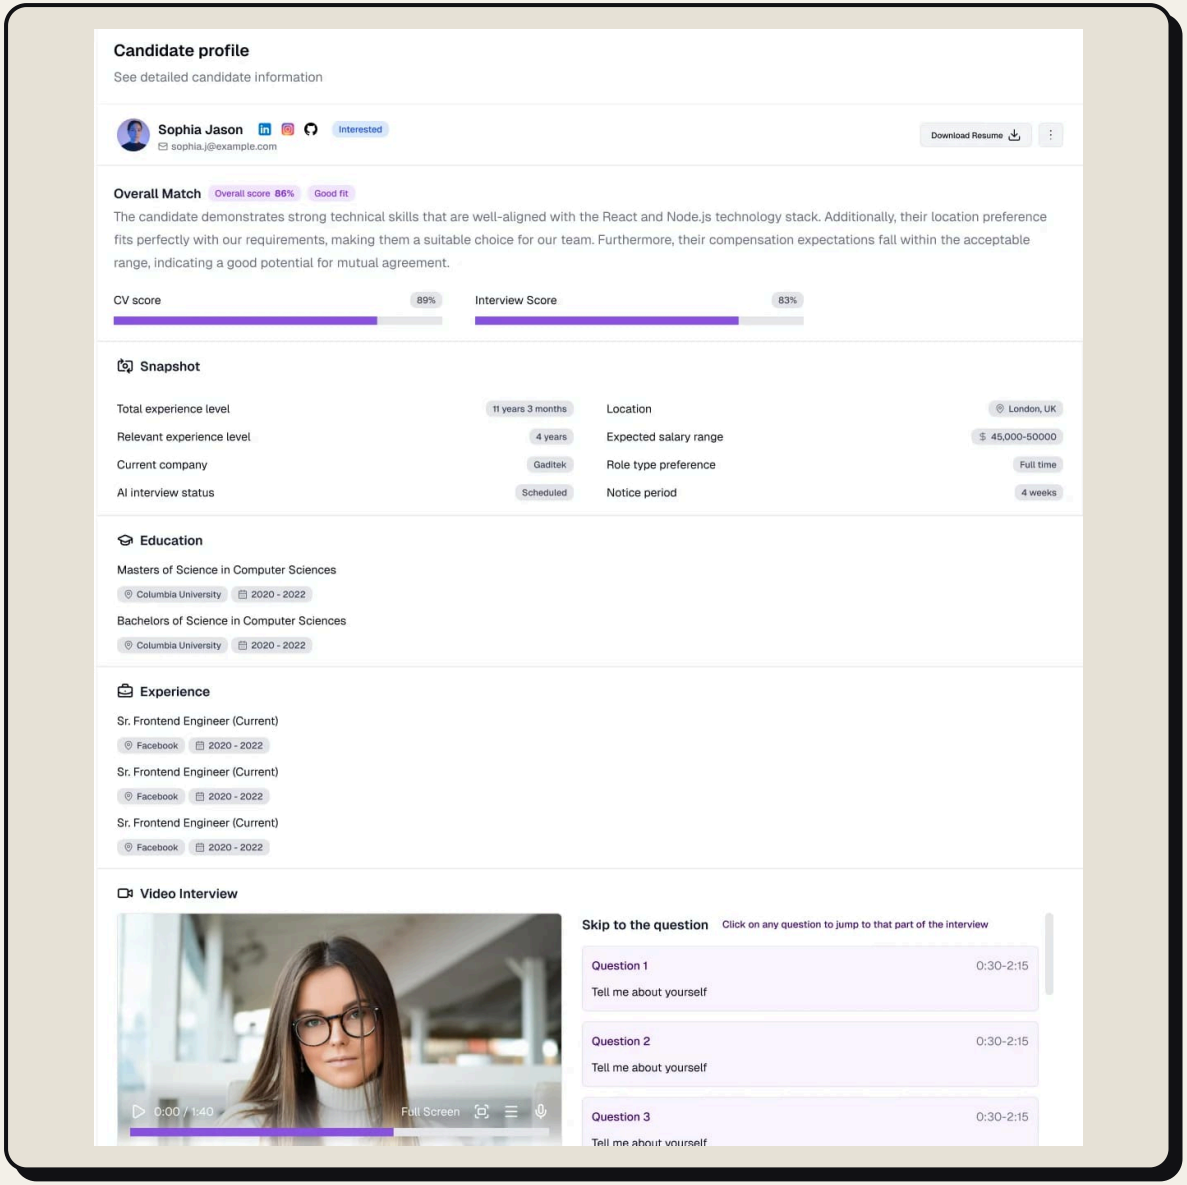

*Measure drop-off per checkpoint from the first release.*

HCI LENS

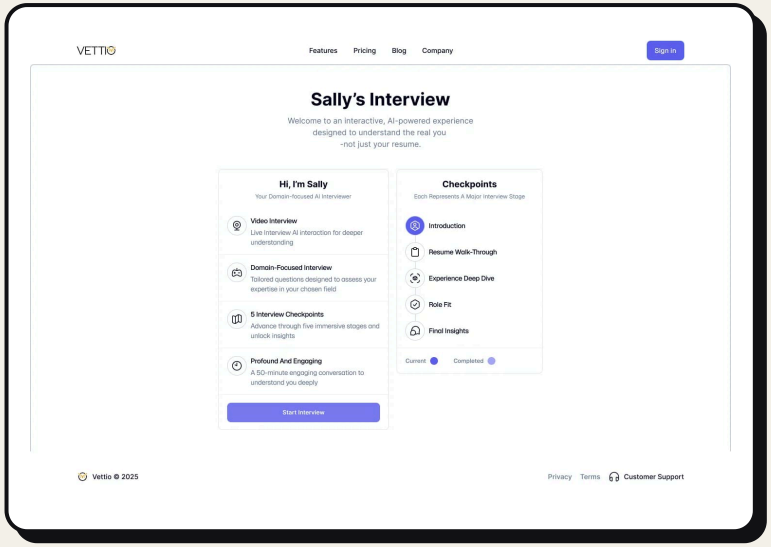

Explainable AI | Fairness in AI decision support

Full case study → rabiyaijaz.vercel.app/work/vettio

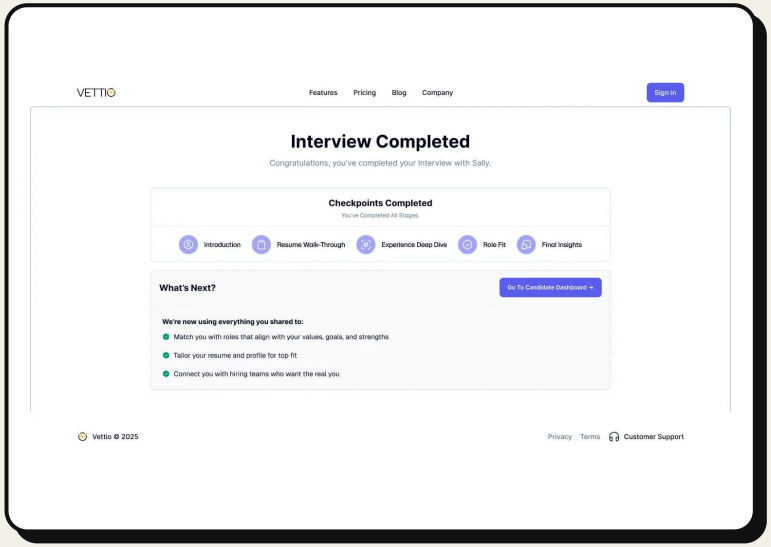

## HIGHLIGHTS

The candidate profile: scores up top, evidence underneath.

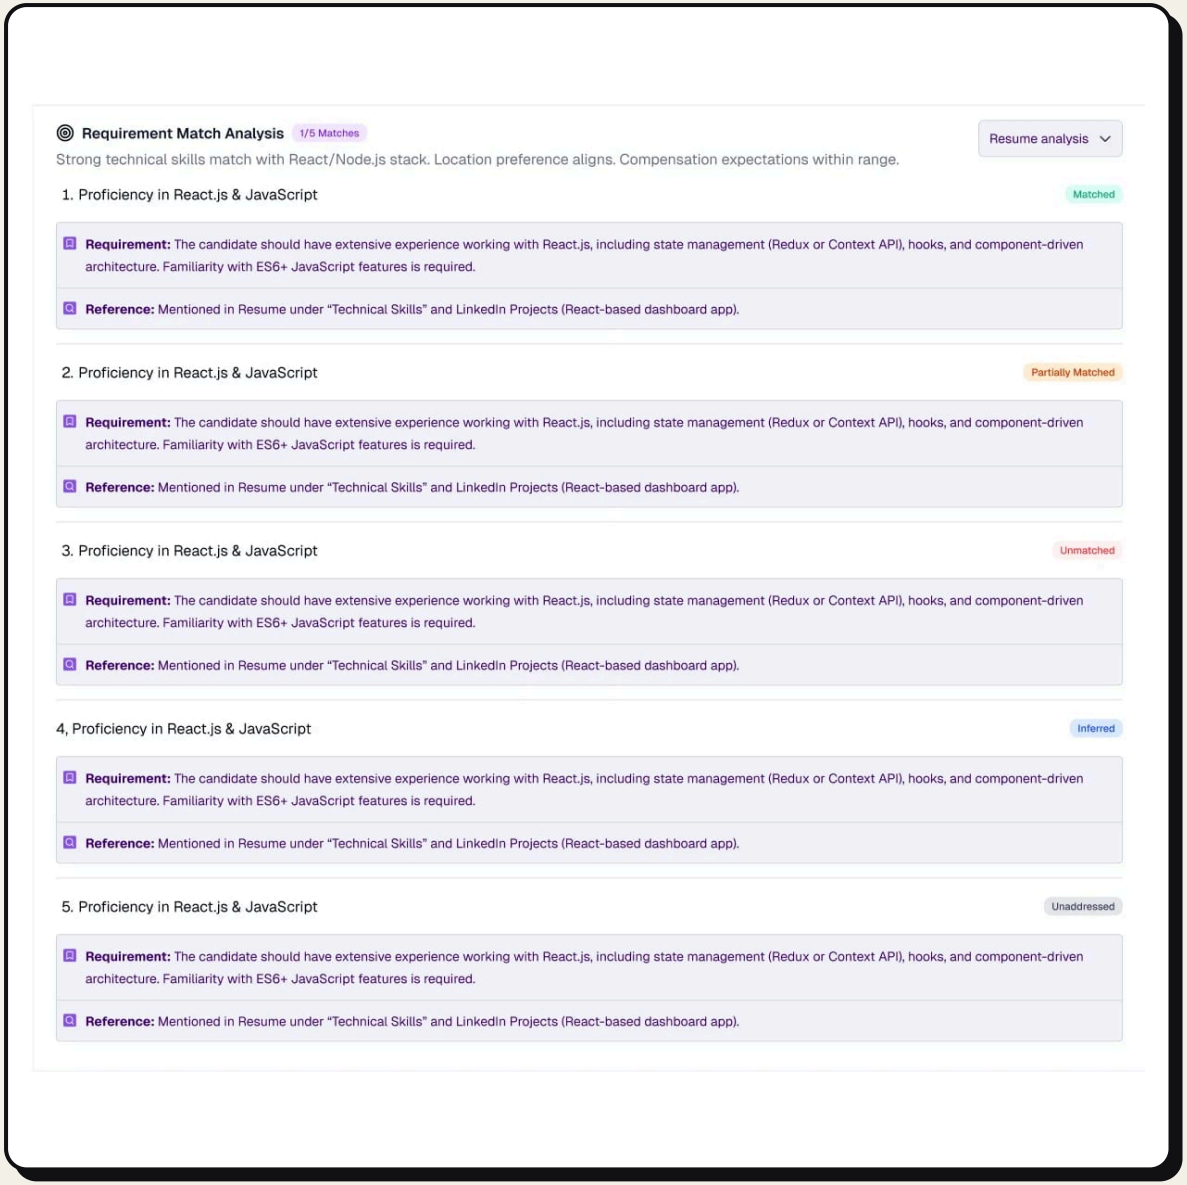

Before starting, Sally shows the whole path.

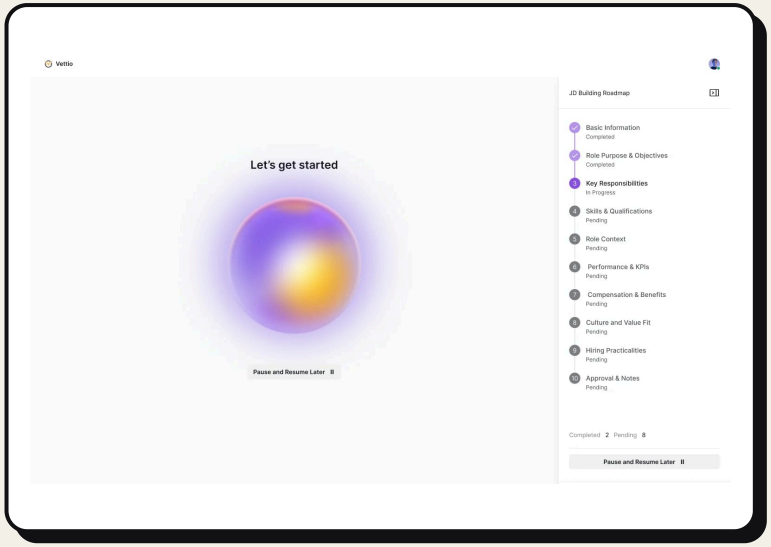

The end is an end: every checkpoint ticked.

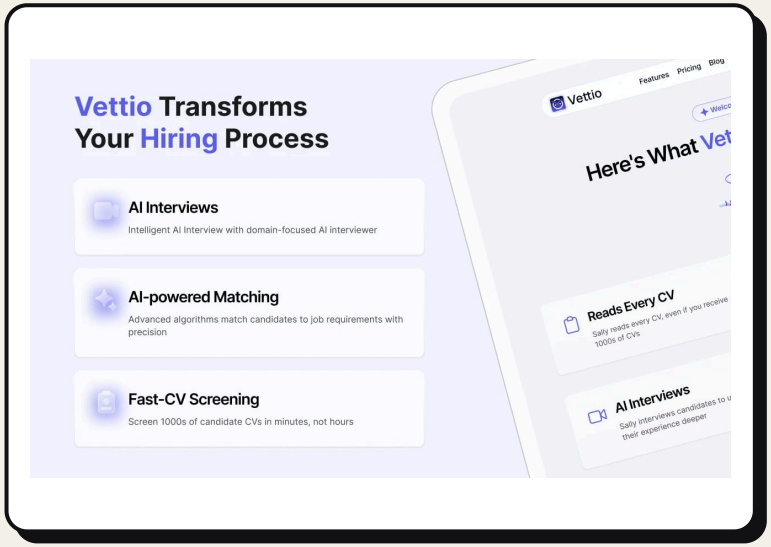

## HIGHLIGHTS

Requirement match analysis: one state per requirement, each with its source.

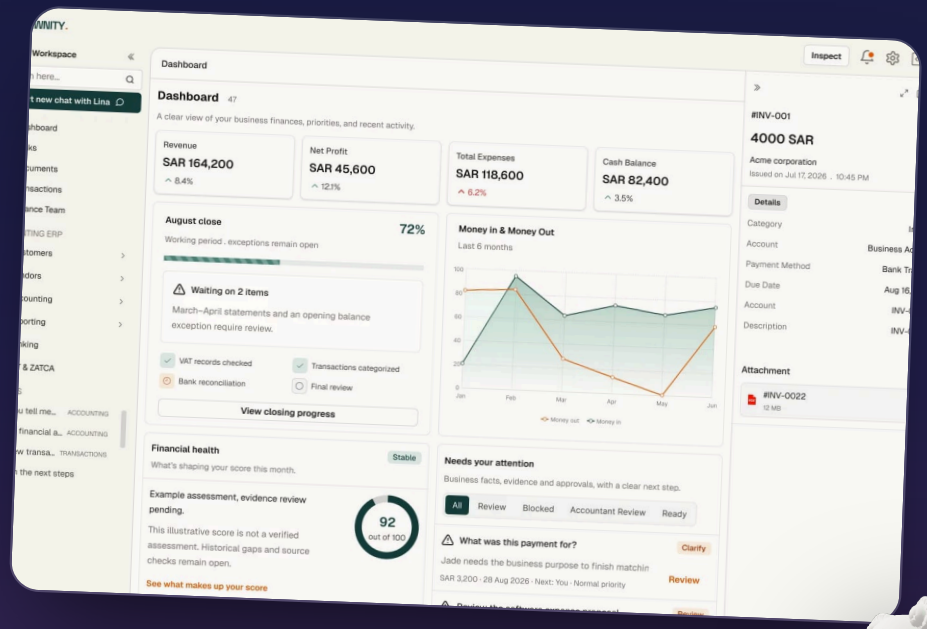

Setting up a role, one step at a time.

What Vettio does.

02

CREWNITY · AI FINANCE · 2026

# A FINANCE TEAM YOU CAN TALK TO.

ROLE
Lead Product Designer

TIMELINE
Jul 2026 – present

CONTEXT
Crewnity, Saudi Arabia (remote)

THE QUESTION

# Can a conversation replace accounting knowledge?

METHOD

01
Requirements validated with finance experts

02
Prototypes compared: traditional vs conversational UI

03
Five landing directions for one promise

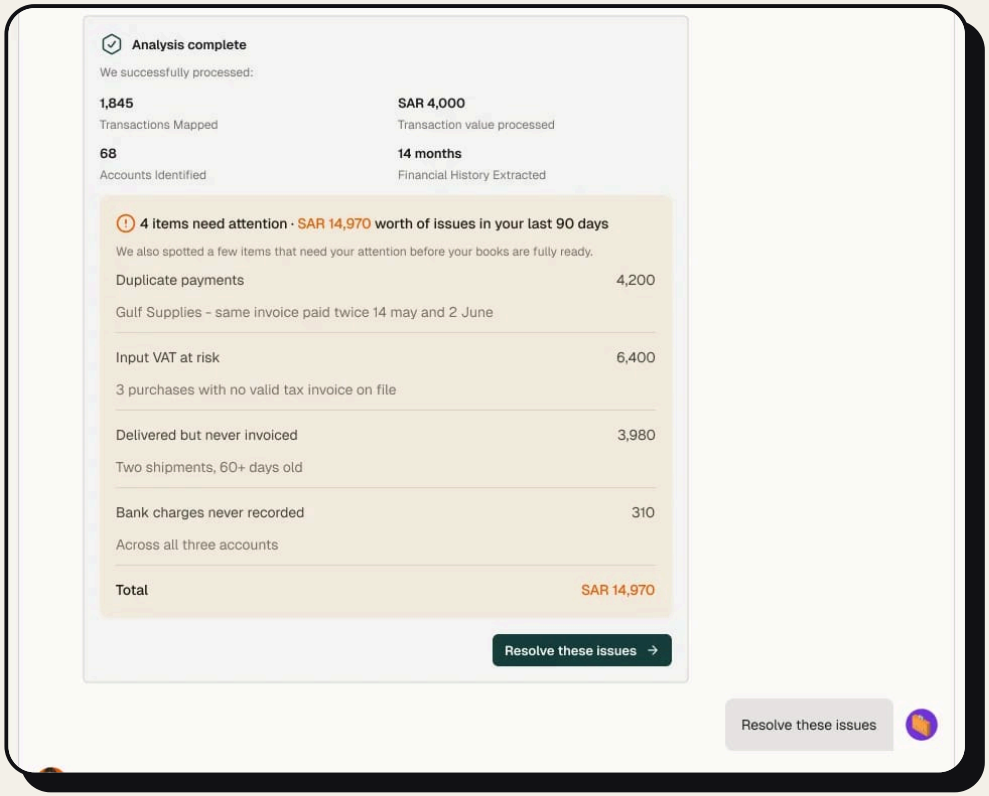

**4**
AI agents behind one point of contact

FINDING

> *Owners don’t speak accounting, and shouldn’t have to.*

SO I DECIDED

# NOTHING THE AI EXTRACTS BECOMES YOUR BOOKS UNTIL YOU’VE SEEN IT.

OUTCOME

# ONGOING. NOT MEASURED YET.

NEXT TIME

*Test whether owners trust Lina with their books.*

HCI LENS

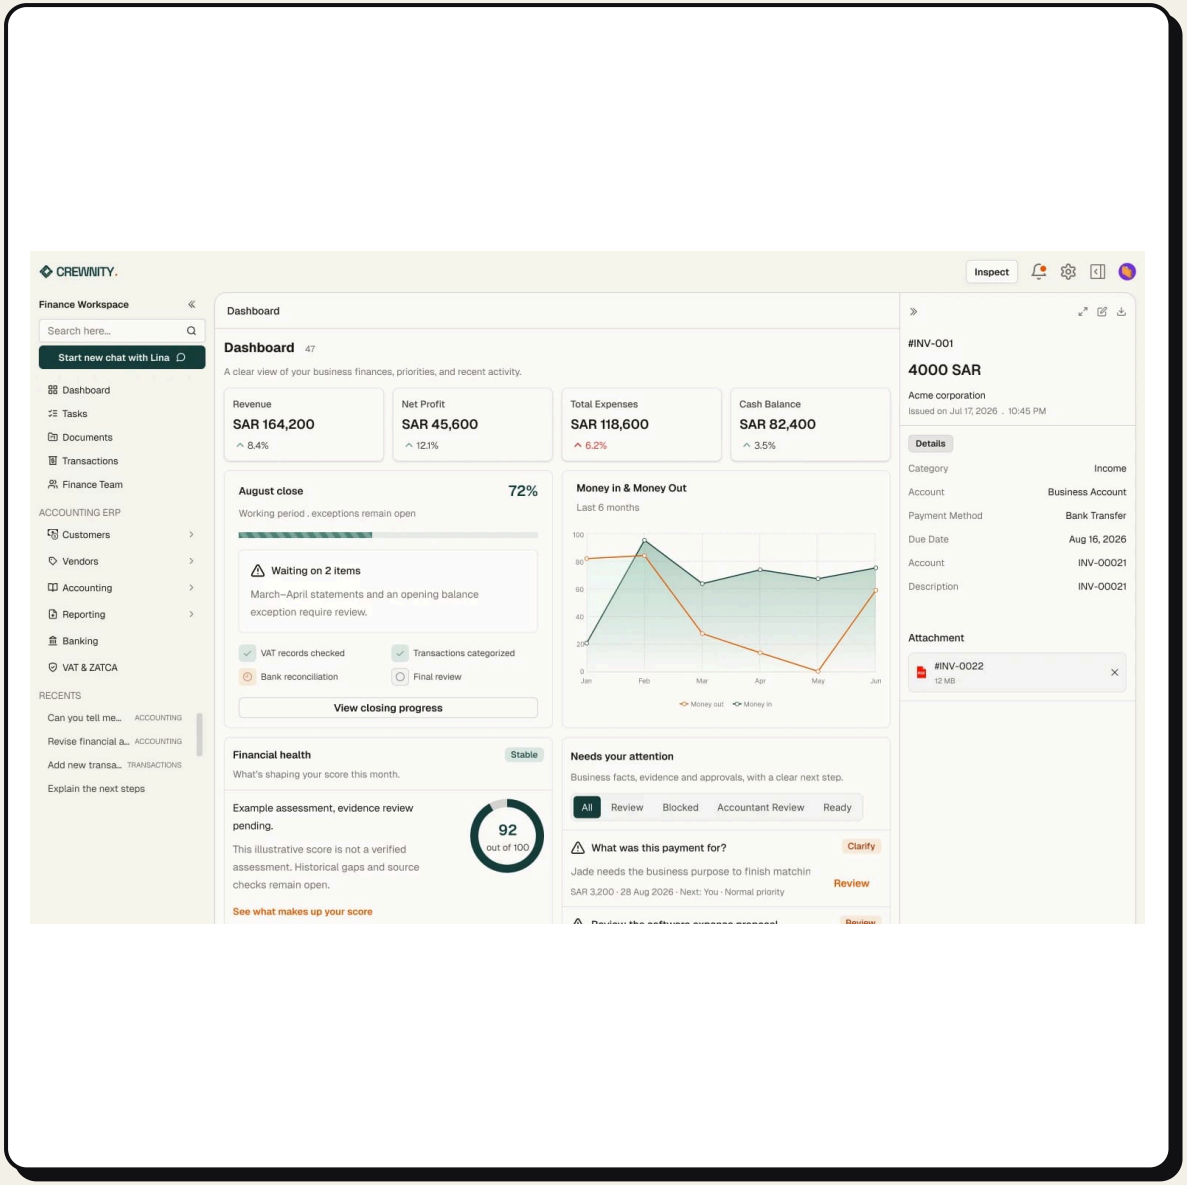

Human-in-the-loop design

Mixed-initiative interaction

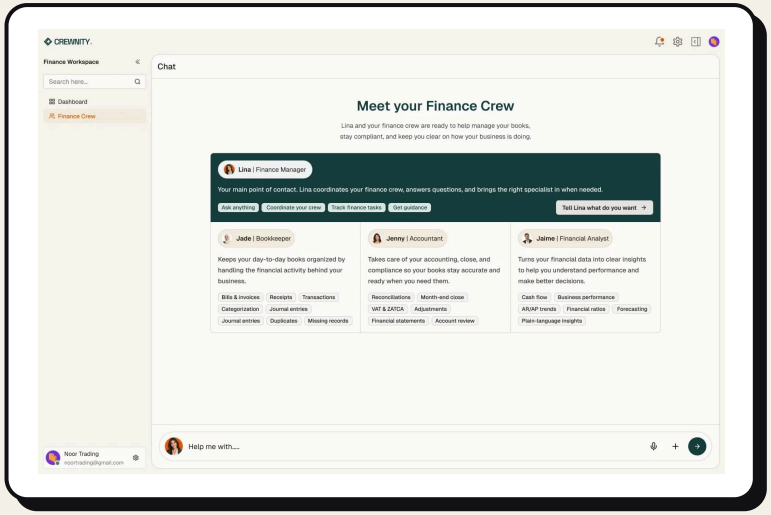

Trust calibration in AI

Full case study → rabiyaijaz.vercel.app/work/crewnity

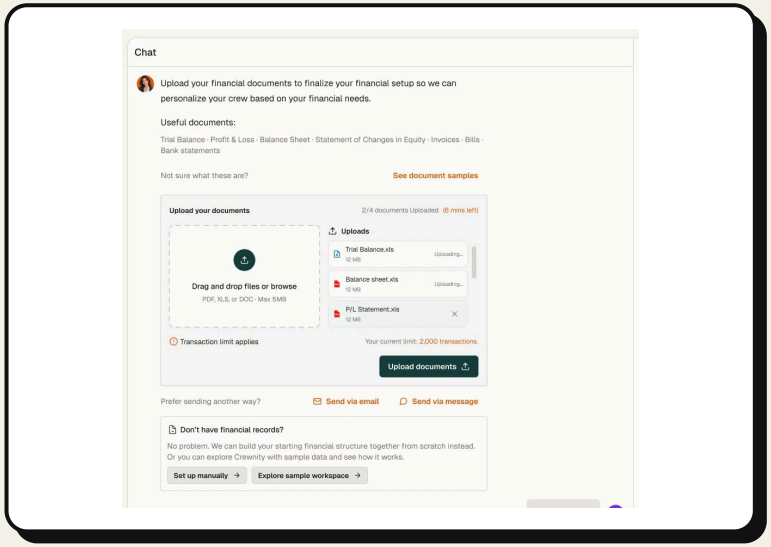

## HIGHLIGHTS

The month at a glance.

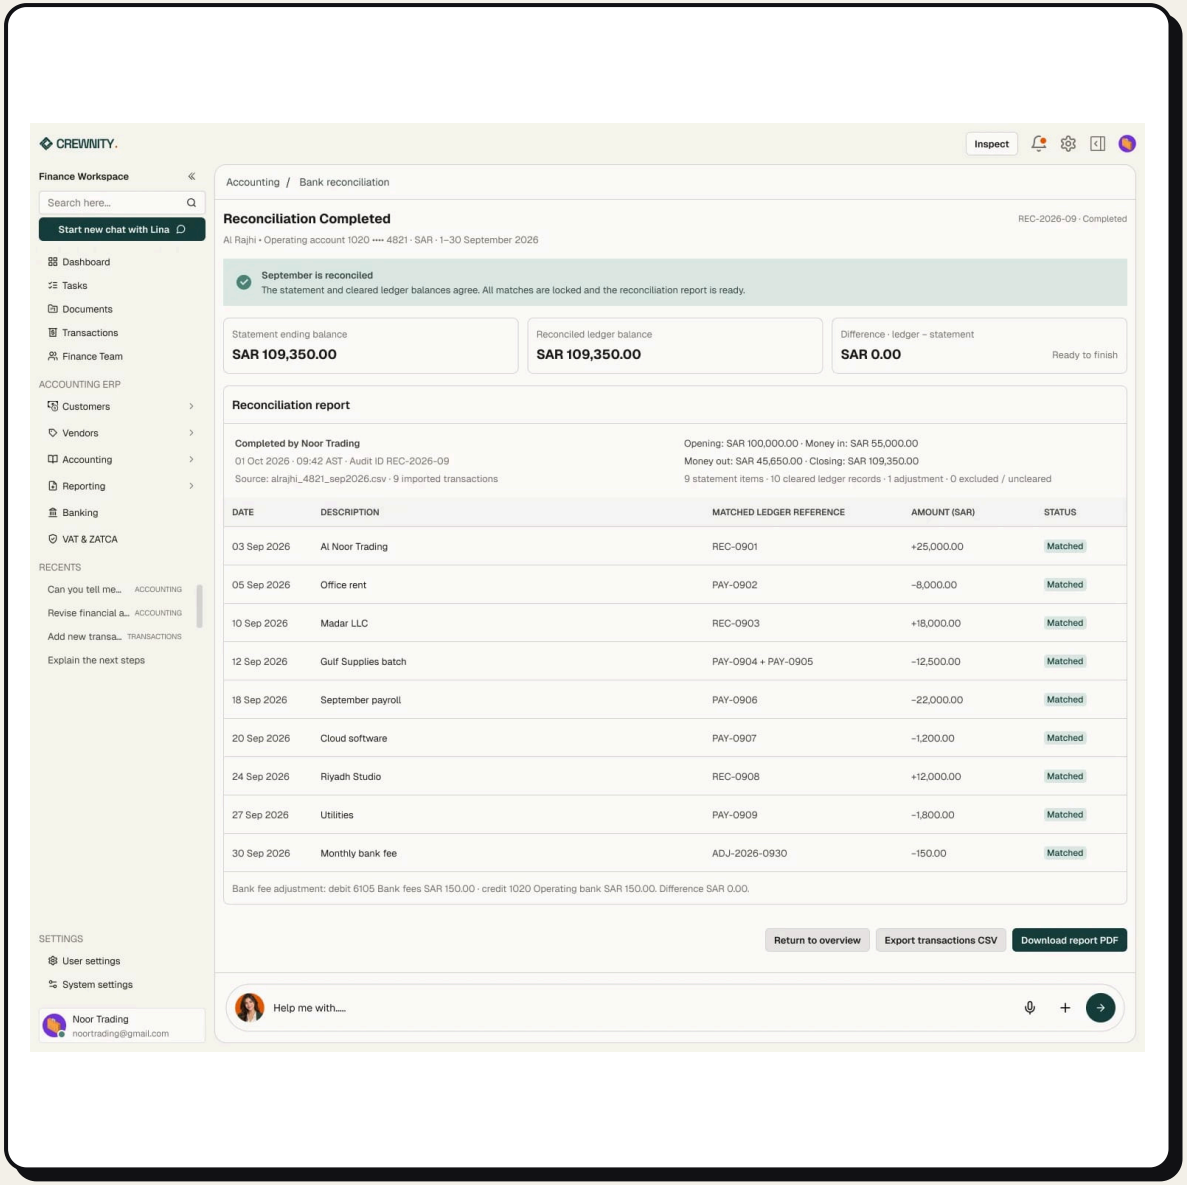

Meet your Finance Crew: one point of contact, three specialists behind her.

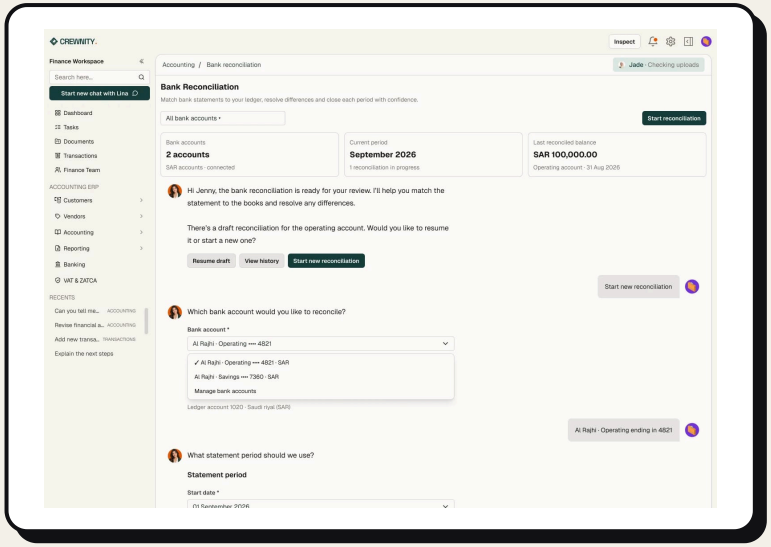

Setup starts as a conversation, not a form.

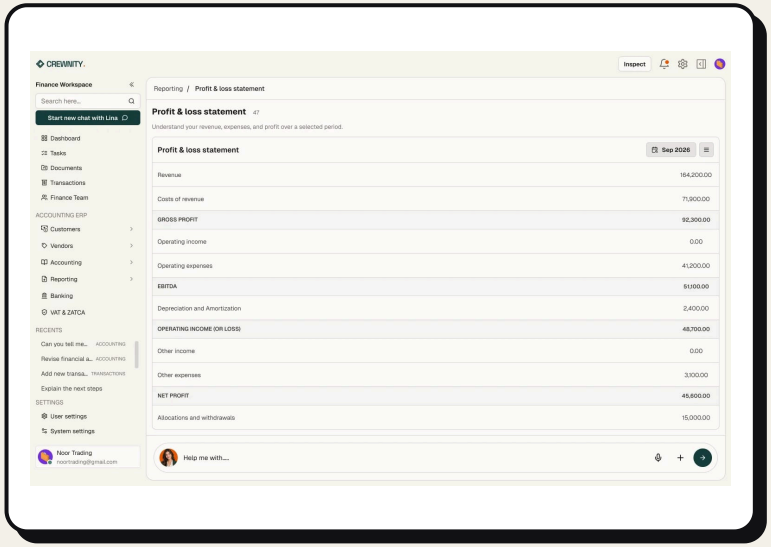

## HIGHLIGHTS

Done: every line matched, ready to export.

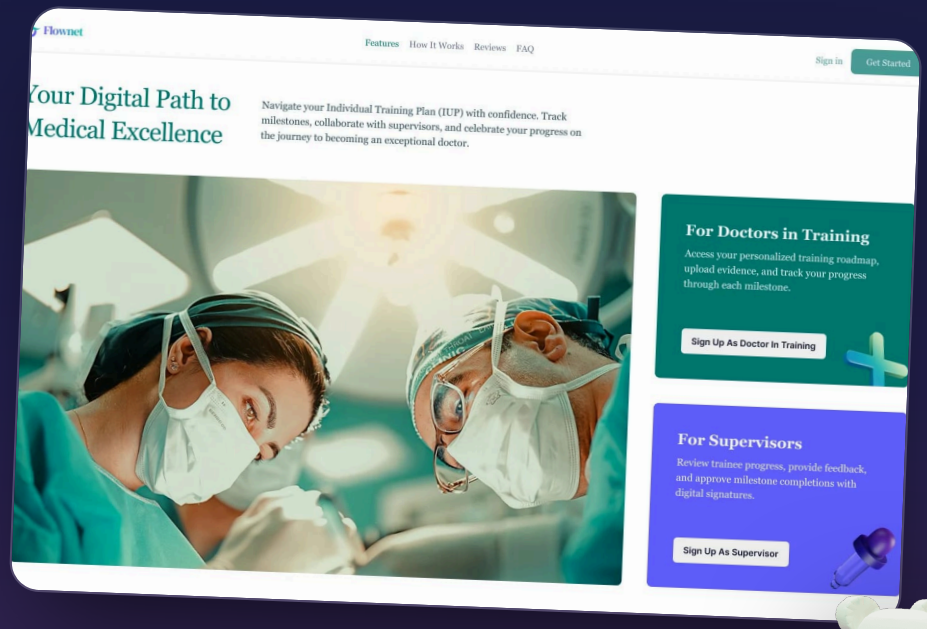

Or the conversation: which account, which period.

Profit & loss: net profit ties back to the dashboard.

03

FLOWNET · CLINICAL TRAINING · 2025

# SIGN-OFF, WITH THE EVIDENCE IN THE ROOM.

ROLE
Lead Product Designer & Advisor

TIMELINE
Sep – Dec 2025

CONTEXT
Swedish government hospitals

THE QUESTION

# How do supervisors approve work they can’t see?

METHOD

01

Interviews with doctors in Swedish training programmes

02

Two role journeys: doctor and supervisor

**4**

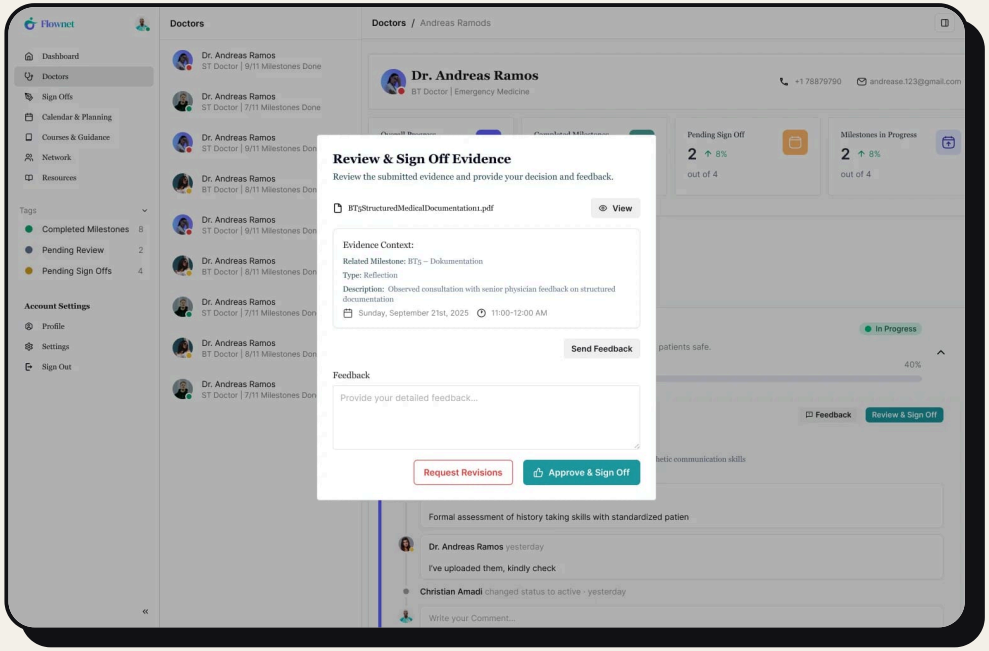

months, from first interviews to MVP

FINDING

> *A file alone doesn't prove a milestone. Evidence needs context.*

SO I DECIDED

# BRING THE EVIDENCE INTO THE SIGN-OFF DECISION.

OUTCOME

# MVP FOR SWEDISH GOVERNMENT HOSPITALS.

NEXT TIME

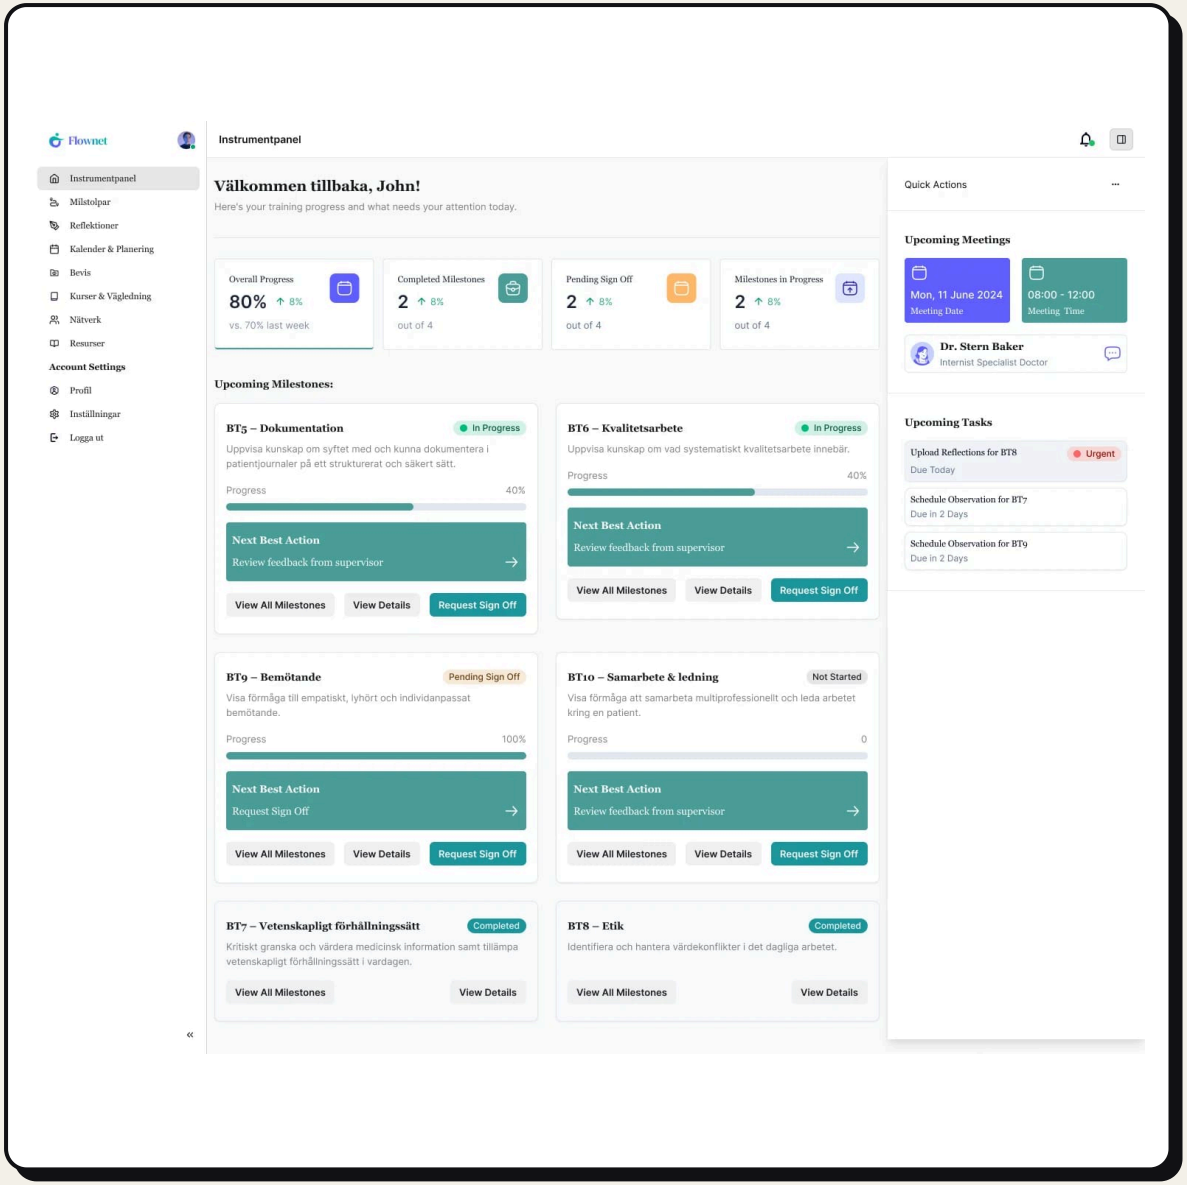

*Prototype the import of paper history first. That's where adoption is won.*

HCI LENS

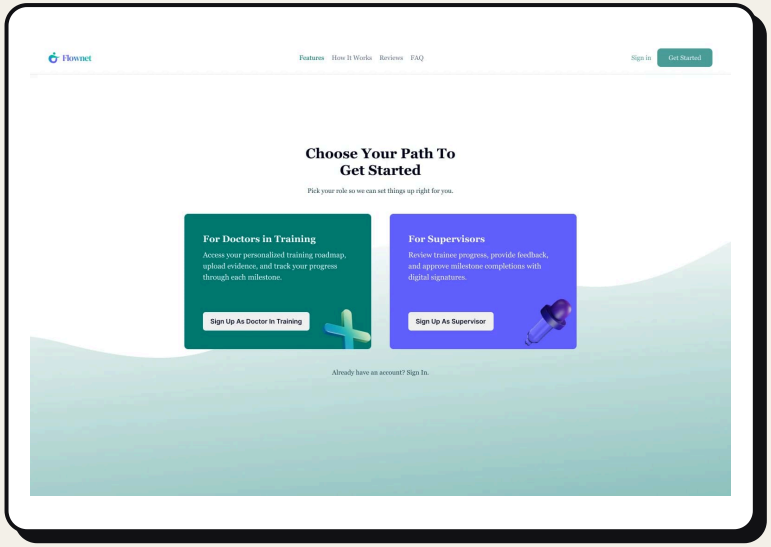

CSCW | Invisible work in clinical practice

Full case study → rabiyaijaz.vercel.app/work/flownet

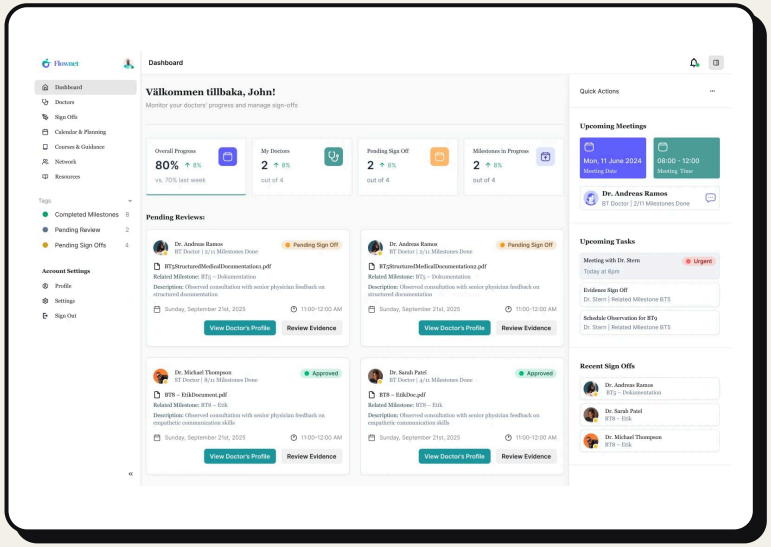

## HIGHLIGHTS

Doctor view: what's next.

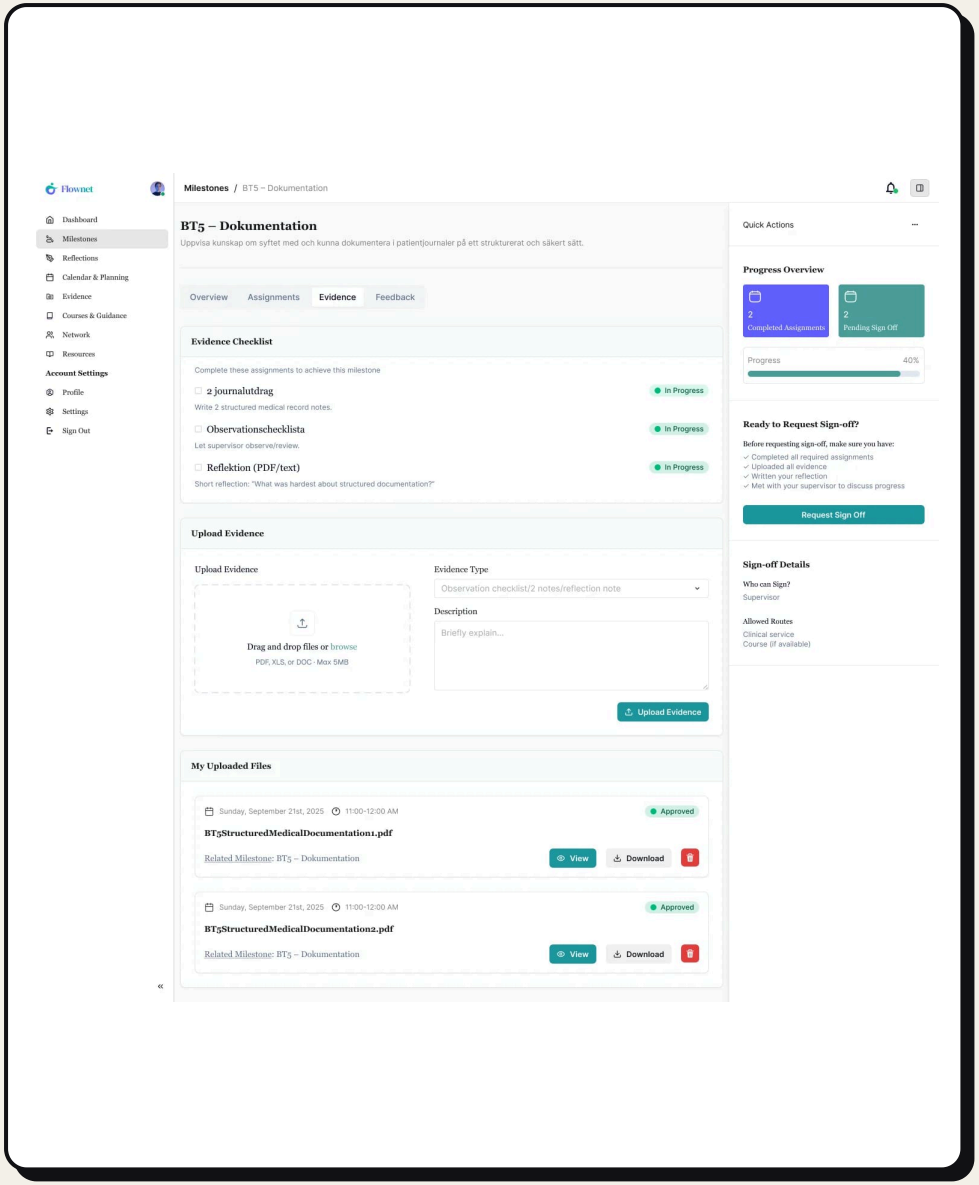

Choose your path.

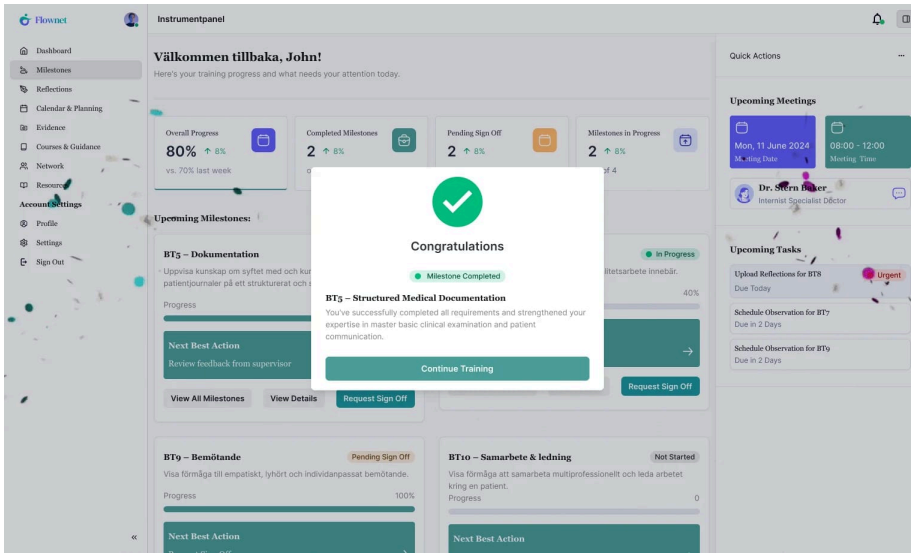

Supervisor view: who's waiting.

## HIGHLIGHTS

The doctor attaches evidence to the milestone.

A long road gets a small celebration.

04

CYSTERCARE · WOMEN'S HEALTH · AI · 2026

# NOBODY HOLDS THE WHOLE PICTURE.

| ROLE | TIMELINE | CONTEXT |
| --- | --- | --- |
| Service Design Lead | Research 2025 · Build Jan – Apr 2026 | Team Peshawar × Imaginathon |

THE QUESTION

# Where does PCOS/PMOS care break down, and what can people trust?

METHOD

01
15+ papers, incl. the 2023 International PCOS Guideline

02
7 interviews with people living with PCOS/PMOS

03
3 specialist interviews

04
A service blueprint across seven care areas

**10**
conversations, after 15+ papers

FINDING

> *People learn from other women more than from leaflets.*

SO I DECIDED

# LIVED EXPERIENCE AND EVIDENCE: SIDE BY SIDE, NEVER MIXED.

OUTCOME

# 5TH PRIZE AT IMAGINATHON.

NEXT TIME

*A prize isn't a usability result. Next: a study with people managing PCOS/PMOS.*

HCI LENS

Service design

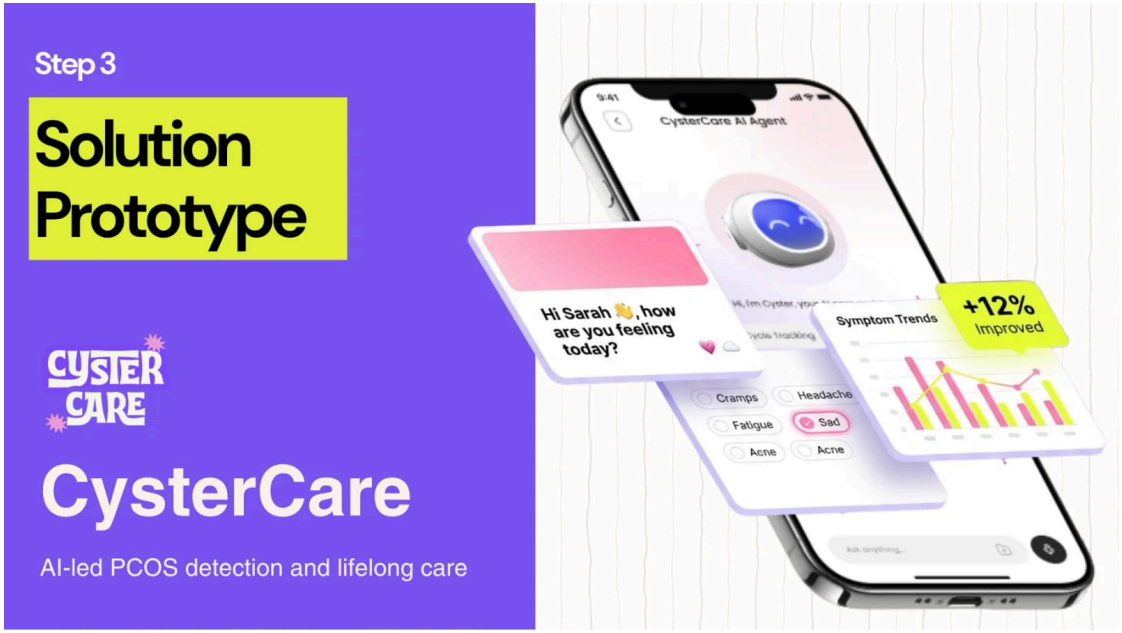

Health information trust

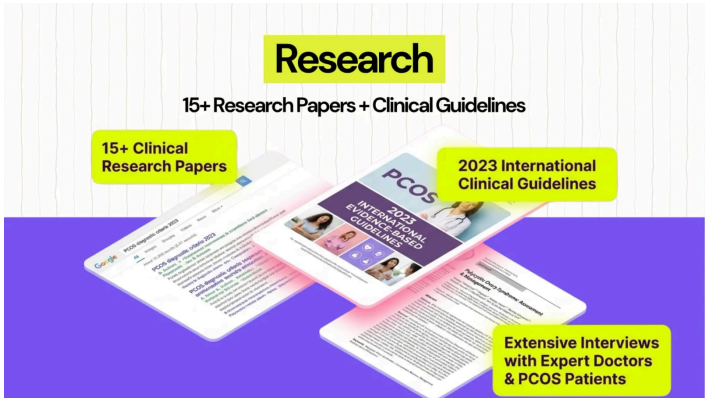

Designing for sensitive contexts

Try the live app: cystercare-eqfs.vercel.app

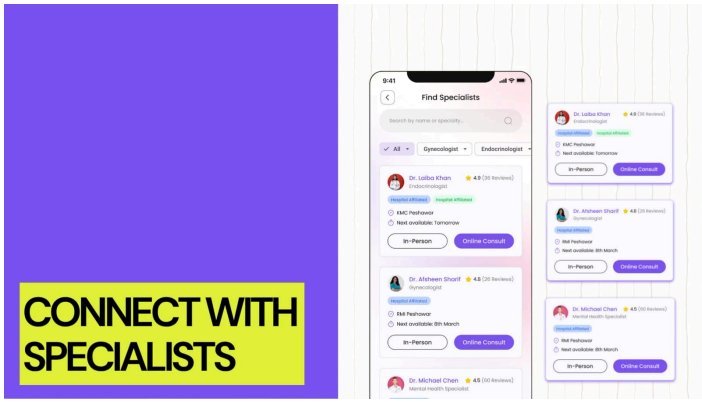

Full case study → rabiyaijaz.vercel.app/work/cystercare

## HIGHLIGHTS

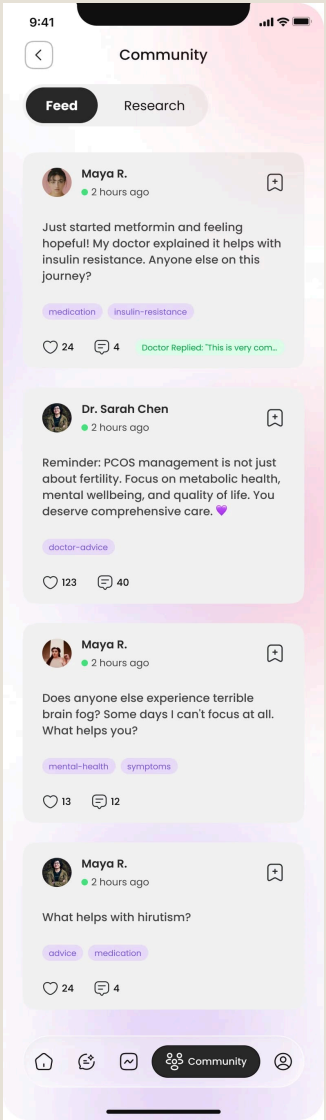

Literature first, so the interviews could go deeper.

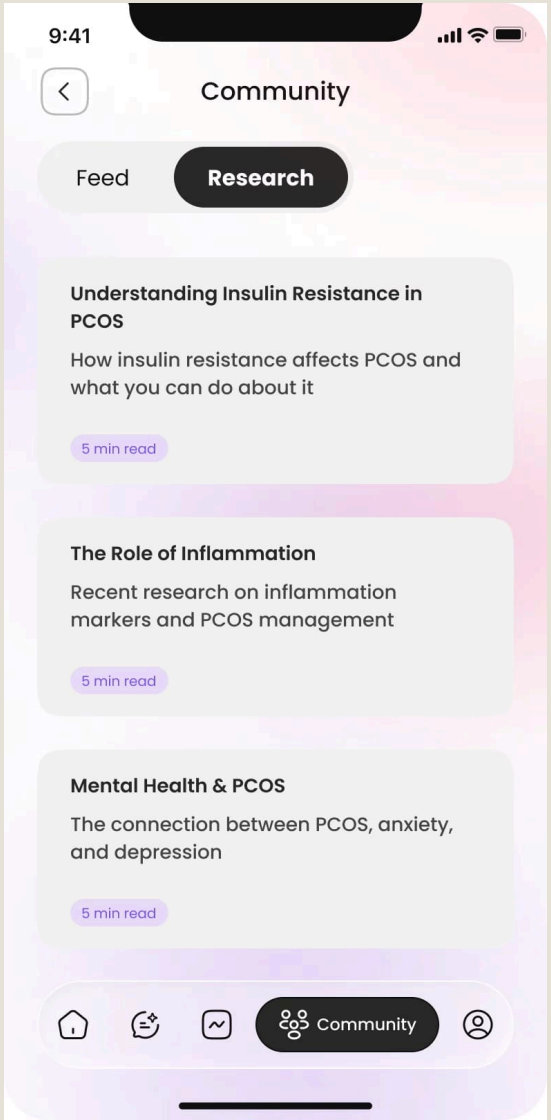

Finding the right specialist.

## HIGHLIGHTS

Community: lived experience.

Research: evidence, labelled as such.

05

ACCESS ADDA · ACCESSIBILITY GAME · PERSONAL

# ACCESS IS A FAVOUR. IT SHOULD BE A FEATURE.

ROLE
**Design and build**

CONTEXT
**Personal project**

THE QUESTION

# How do you make people feel the difference between help and independence?

METHOD

01
Real places and people from Peshawar

02
Scoring built on the four WCAG principles

03
An audit of my own first prototype

**3**
languages: English, Urdu, Pashto

FINDING

> *The fix people reach for first keeps someone dependent.*

SO I DECIDED

# MAKE A BAD FIX VISIBLY WORSE THAN A GOOD ONE.

OUTCOME

# PLAYABLE, IN THREE LANGUAGES.

NEXT TIME

*Not yet played with people. Next: playtests with disabled people in Peshawar.*

HCI LENS

Participatory design | Inclusive design | Serious games

Play it live: rabiyaijaz.vercel.app/work/access-adda#play

Full case study → rabiyaijaz.vercel.app/work/access-adda

## HIGHLIGHTS

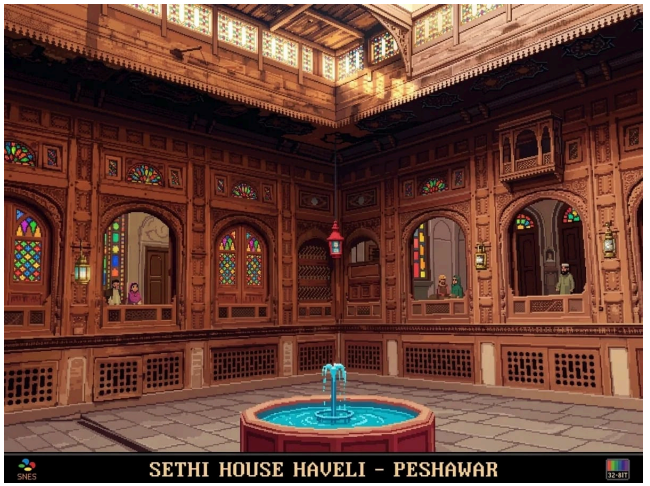

Areeba: a wheelchair user at her university.

A blind commuter at the BRT.

A Deaf woman ordering kahwa in Qissa Khwani.

A power-wheelchair user at Sethi House.

06

TAMASHA BANAO · COMMUNITY · BRAND AND UX · 2026

# BRICKS, ON STRINGS.

ROLE
Banao.pk ambassador, design strategy

CONTEXT
Banao.pk community (volunteer)

THE QUESTION

# How does a community of builders throw a show about performing?

METHOD

01

A brand audit of banao.pk’s live stylesheet

02

Four puppet-theatre references, each turned into a rule

**6**

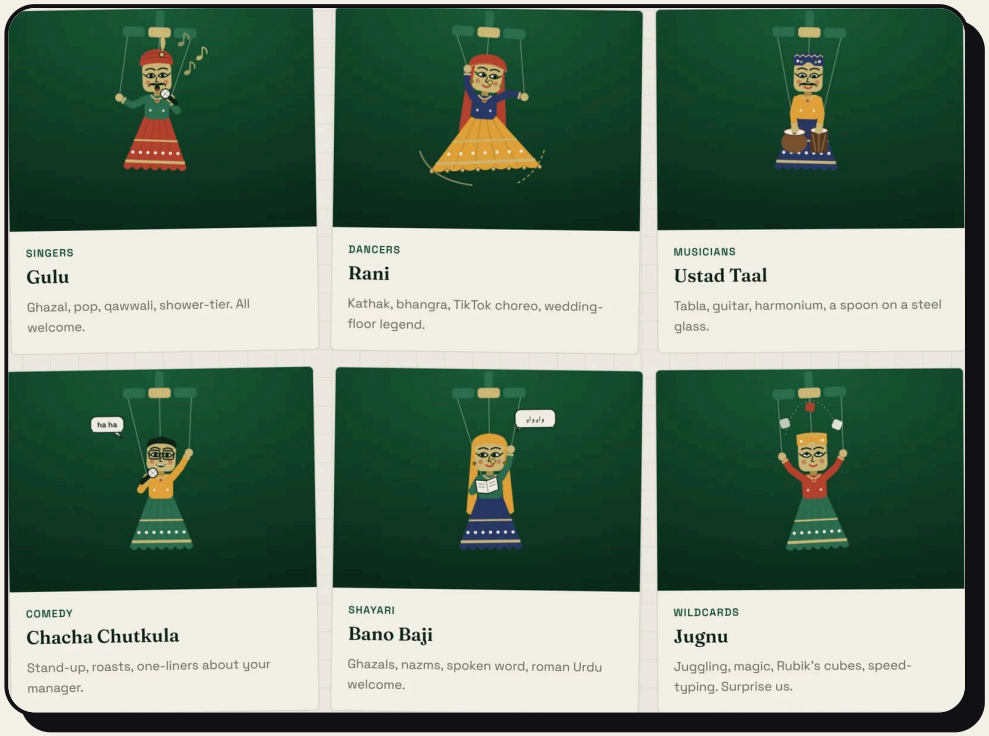

puppets, one rig

FINDING

> *Banao's logo already had one loose gold brick.*

SO I DECIDED

# THE LOOSE BRICK BECOMES EVERY PUPPET'S HEAD.

OUTCOME

# STYLE DIRECTION V1, PRESENTED OCTOBER 2026.

NEXT TIME

*Lock a poster direction, then build the /tamasha page.*

HCI LENS

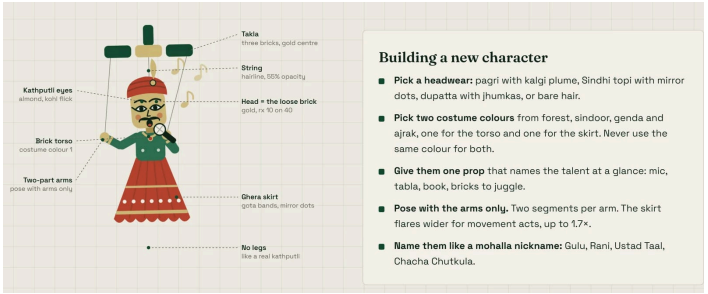

Community-centred design | Culturally grounded design

Full case study → rabiyaijaz.vercel.app/work/tamasha

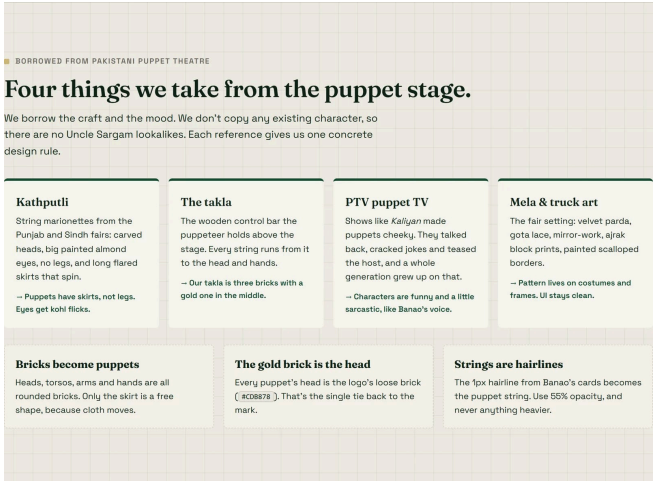

## HIGHLIGHTS

The /tamasha stage hero.

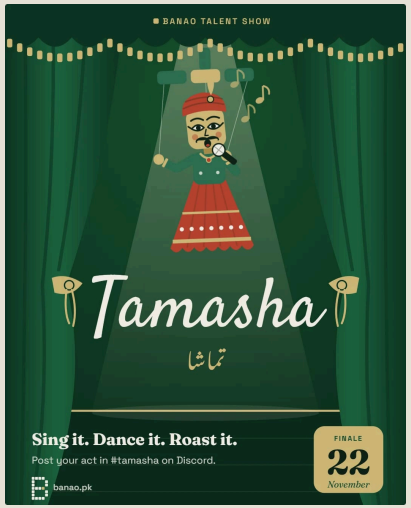

One rig. Head = the loose brick.

Research to rules.

## HIGHLIGHTS

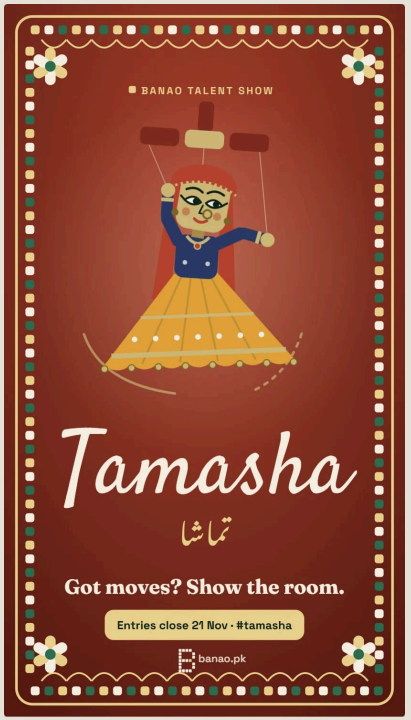

A · Parda Utha

B · The Lineup

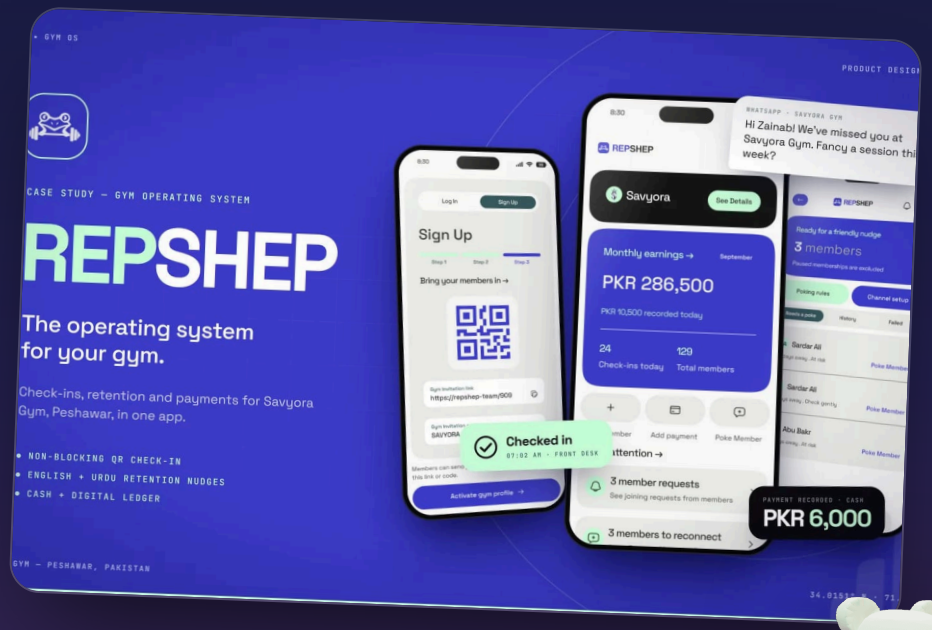

C · The B is a puppet

D · Ghoomar

07

REPSHEP · GYM MANAGEMENT · AI · PERSONAL

# EVERY OVERDUE PAYMENT IS A PERSON.

ROLE
Designer

CONTEXT
Personal project

THE QUESTION

# How can a big gym follow up with hundreds of members, personally?

METHOD

01
Personal project, with mock data

02
No user research yet: flows first, then gym managers

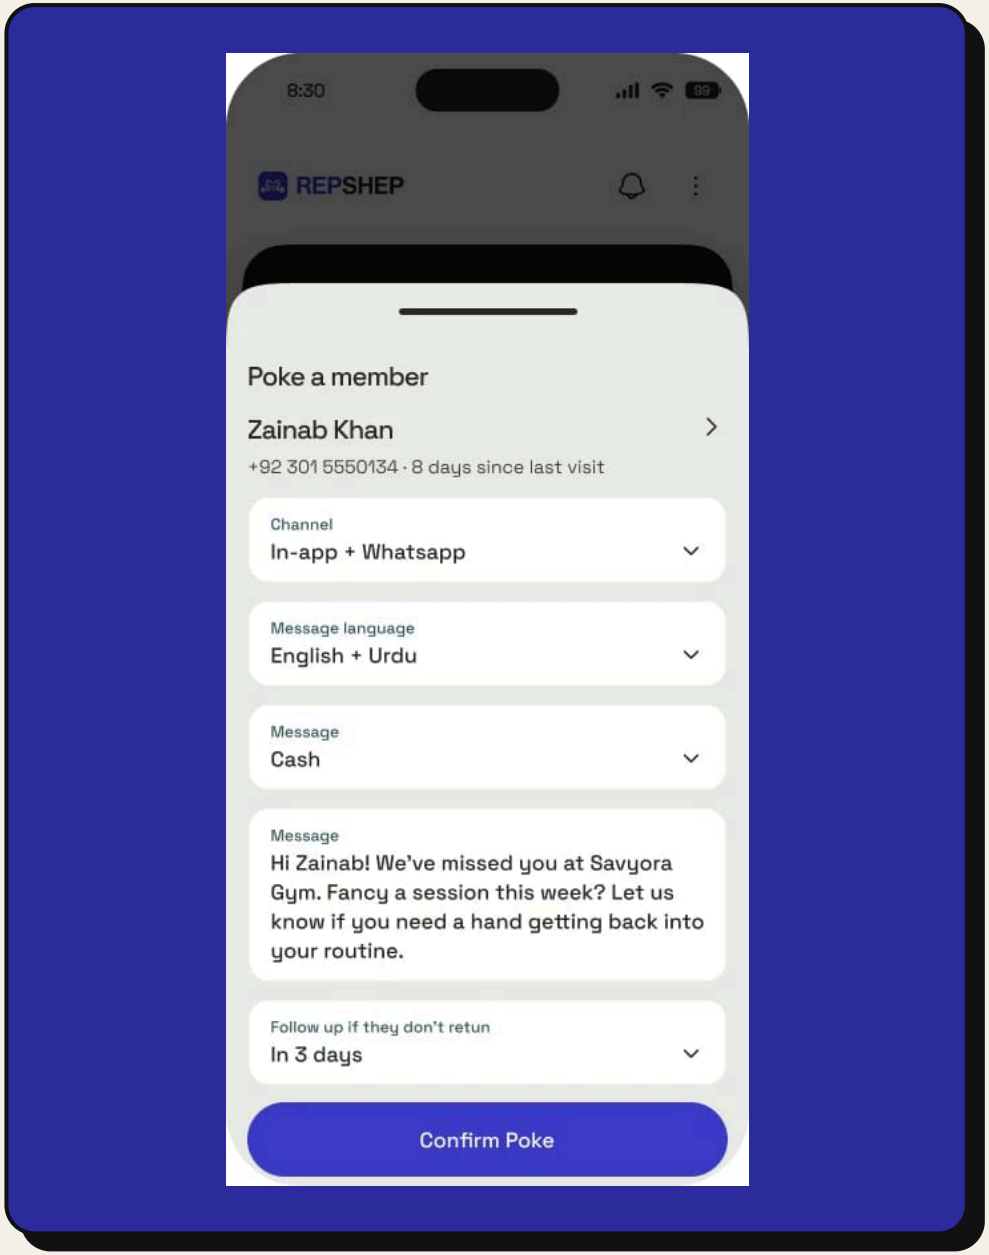

**4**
steps in every nudge, ending in a confirm

PREMISE

> *At that scale, nobody can follow up by hand.*

SO I DECIDED

# AI DRAFTS THE NUDGE. THE GYM APPROVES IT.

OUTCOME

# IN PROGRESS.

NEXT TIME

*Test the flows with gym managers before building the AI.*

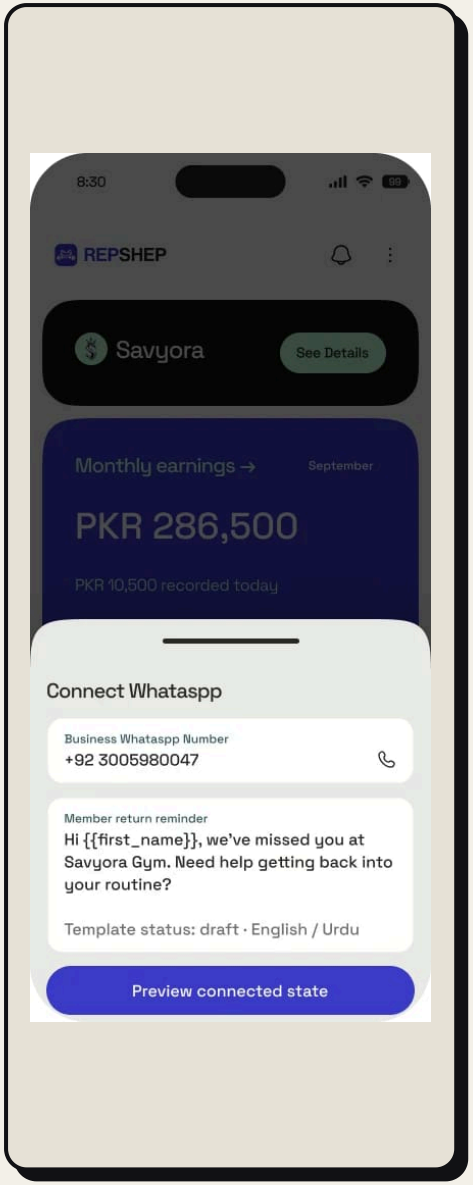

HCI LENS

Persuasive technology and behaviour change

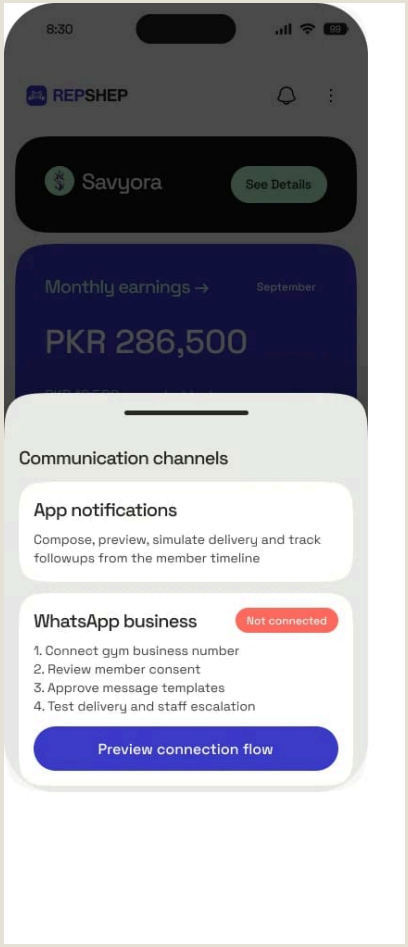

Human-in-the-loop AI

Full case study → rabiyaijaz.vercel.app/work/repshep

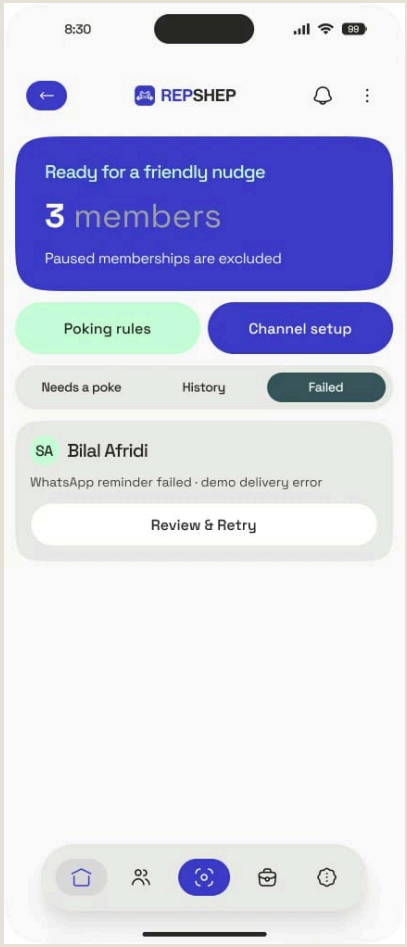

## HIGHLIGHTS

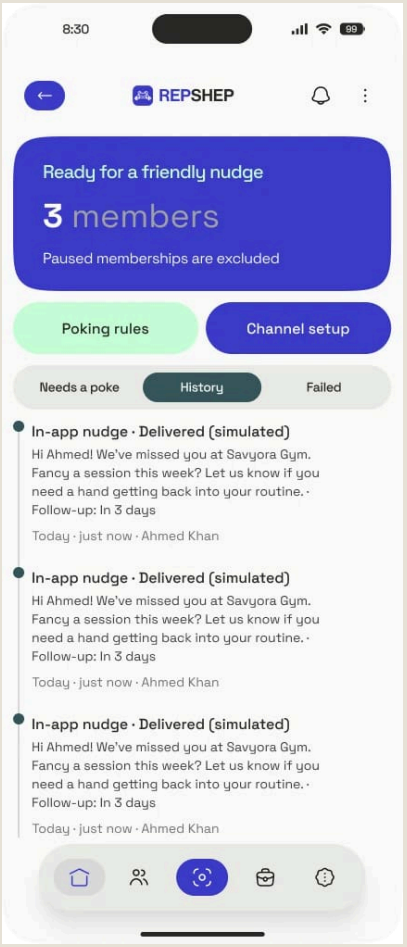

WhatsApp, with a preview.

Channels, kept separate.

Failure is visible.

And so is history.

# LET'S BUILD SOMETHING PEOPLE *actually* *use.*
